Experience

Numerator

Pune, Maharashtra, India

PYTHON ETL ENGINEER

November 2020 - Present

- Developed **Airflow framework** for fetching data from various data sources like emails, postgresql database, oracle database, csv files; performing data transformations and storing it in **snowflake data warehouse**
- Author and maintainer for **CI/CD pipelines** for deployments in various environments
- Developed various **REST APIs** for Numerator data lake products. imaginative insightful curious creative outspoken straightforward direct

Schlumberger

Pune, Maharashtra, India

DATA ENGINEER

July 2018 - Present

- Developed and managed custom **containerized** data ingestion framework using **Nifi**
- Author and maintainer of Source to Hub project which loads data **directly from source into google bigquery**. Project mainly aimed at eliminating intermediate data loading in native hadoop clusters for more efficiency, reliability and speed
- Responsible for implementing and managing an **end-to-end CI/CD Pipelines** with custom validations for Informatica migrations which brought **migration time to 1.5 hours from 9 hours** without any manual intervention
- Enhancing, auditing and maintaining custom data ingestion framework that ingest around **1TB of data each day to over 70 business units**
- Working with L3 developer team to ensure the discussed Scrum PBI's are delivered on time for data ingestions
- Planning and Executing QA and Production Release Cycle activities

Truso

Pune, Maharashtra, India

FULL STACK DEVELOPER INTERN

June 2018 - July 2018

- Created **RESTful APIs** using Django REST Framework
- Created event based fully dynamic frontend using Angular 5/6
- Developed and managed **MySQL databases and RDBMS architecture**

Propeluss

Pune, Maharashtra, India

DATA ENGINEERING INTERN

October 2017 - January 2018

- Wrote various automation scripts to scrape data from various websites that were managed by messaging queue using **Celery pipelines and RabbitMQ**
- Applied **Natural Language Processing** to articles scraped from the internet to extract different entities in these articles using entity extraction algorithms and applying Machine Learning algorithms like **Naive Bayes** to classify these articles
- Applied KNN with LSA for extracting relevant tags for various startups based on their works

Personal Projects

Pyresparser

API/Python Package

July 2019 - Present

- A simple resume parser used for extracting information from resumes
- Extract information from thousands of resumes in just a few seconds
- Author and maintainer of this project
- **71k+ downloads on Github**

Pygorithm

API / Python Package

July 2017 - Present

- Author and maintainer of this project
- An educational library to teach all the major algorithms
- Got covered in Fosstack, FullStackFeed, Kleiber and Tagged under Hotest Github Project on ITCodeMonkey
- **29k+ downloads on Github**

Education

Marathwada Mitra Mandal's College of Engineering

B.E. IN COMPUTER ENGINEERING

Pune, Maharashtra, India

2014 - 2018

Skills

Programming Languages: Python, C, PHP, C++, Shell Script

Frontend Technologies: HTML, CSS, JavaScript

Backend Technologies: Django, Flask (Python)

Operating Systems: Linux, Unix, Windows

Databases: MySQL, PostgreSQL, SQLite, MongoDB, Snowflake
